Aboriginal: Mound Builders and Indians.

MOUND BUILDERS.

I. So called from ancient mounds which they erected.
II. Proofs that they were a different race than Indians:
   1. Indians did not build mounds.
   2. Indians knew nothing of their history.
   3. Their work shows that they were more industrious than the Indians.
III. Their most noted works are found in the Mississippi Valley.
IV. Fate. Some think they were exterminated by disease or famine; others that they migrated southward.

THE INDIANS.

I. Name. Columbus, thinking he had arrived at India, called them Indians.
II. Origin. There are different theories concerning their origin, as it is really unknown.
III. Three Great Indian Families (East of Mississippi).
   1. Muskoge, or Mobilians. Lived south of Tennessee River and comprised the Creek, Seminole, Choctaw and the Chickasaw tribes. These were less savage; more readily adopted some of the habits and customs of whites.
   2. Iroquois. Occupied the country from the Delaware and Hudson, to and beyond the St. Lawrence, and Lakes Ontario and Erie, besides isolated tracts in North Carolina and Tennessee. The chief tribes were:
   The Iroquois proper, forming a confederacy in central N. Y. known as Five Nations:
1. Senecas.
2. Cayugas.
3. Onondagas.
4. Oneidas.
5. Mohawks.

Besides these five nations the following belonged to the Iroquois: Hurons, Erie, Cherokees and Tuscaroras. The Tuscaroras were later adopted by the five nations, thus forming the "six nations."

3. Algonquins. Occupied the rest of what is now the United States east of the Mississippi, besides the larger part of Canada. In this group were:

1. Mohegans.
2. Pequots.
4. Delawares.
5. Powhatans of Virginia.

TRIBES WEST OF THE MISSISSIPPI.

1. Sioux or Dakotas.
2. Shoshones.
3. Pueblos.
4. Apache.

DESCRIPTION OF INDIANS.

1. Personal Appearance—Tall, straight, athletic, and well-formed; copper color, high cheek bones, long, straight black hair.

Scalp-lock—Tuft of hair on top of head to enable enemy to scalp more easily.

2. Traits of Character—Quick-witted, keen-sighted, swift of foot. They bore physical pain with marvelous bravery; their self-control was wonderful; they possessed courage and fortitude in highest degree. Treacherous, revengeful and cruel beyond description.

3. Dress—But little in summer; in winter skins of animals, decorated with beads, feathers, scales of enemies. Moccasins on their feet. When traveling in winter they wore snow shoes made of light wood, covered with net work of strings of hide. They painted their faces, and the manner of painting had great significance.

Wampum—Beads made of shells, used by Indians for making belts, etc.

4. Dwelling—Tents called wigwams; circular in shape made with poles joined together at top and covered with skins or mats. No windows; fire built in center on the ground. Smoke escaped thru opening at the top.

Some Indians built dwellings with rudely framed sides and roofed with elm bark; they were about 20 feet wide and 100 feet long; door at each end.

5. Weapons—Bows and arrows; tomahawks and knives.

6. Religion—They believed in a good spirit who brought sunshine, peace, good harvest, etc., and in an evil one who brought disease, famine, etc. They expected another life after death, to be spent in

the "happy hunting grounds". Singing and dancing were important parts of their religion. No sick cured, no war planned, no treaty made without a dance, which often lasted several days.

When a person died, the Indians wailed and howled a mournful song (called the death-song), in which they told all the virtues and vices of the departed.

7. Education—Had neither books nor letters, but some tribes practiced picture-writing on bark or tanned skins.

8. Government—All the families tracing descent from a common ancestor, formed a clan. Each clan had its own name (usually that of some animal, as the wolf, the bear or turtle); its own sachem or civil magistrate, and its own chief, chosen in time of war and continuing in office as long as he lived; its own sorcerers, called pow-pows, or medicine-men, who had still great power, owing to the superstitions of the people. They really had some skill in healing sick persons by vapor-baths and extracts of roots and herbs.

A number of such clans made a tribe, which had one language and was governed by a council of the clan sachems. Each tribe had its "totem" or badge, usually the picture of some animal, to designate it.

The most daring seamen of Europe were the Northmen, inhabitants of Norway and Sweden; made settlements in Iceland, 874.

Most noted of this period was:

Leif Ericson—Landed in Labrador, and explored New England coast, A. D. 1000.

Result—Nothing permanent.

PERIOD OF EXPLORATION AND DISCOVERY
(1492-1607)

Need of a new route to India.

Commerce of Europe was with India.

Reason—India supplied Europe with dyes-stuffs, spices, precious stones, shawls, etc.

Two leading commercial cities of Europe were Venice and Genoa.

Route to Venice from India: India Ocean, Red Sea, Isthmus of Suez, Mediterranean Sea, Adriatic Sea, Alexandria chief port.

Route to Genoa from India: Merchandise brought overland by caravans to the Black Sea, vessels sailed thru Black Sea, Mediterranean Sea, to Genoa. Constantinople chief port.

Constantinople was taken by the Turks (1453) and the route to Genoa was abandoned. About the same time in Egypt excessive dues were exacted; the commerce of Venice became unprofitable; this led the merchants of Europe to seek for a new route to India.

One of the principal navigators of Genoa was Christopher Columbus. Columbus was born at Genoa 1455. Father a poor, industrious weaver. Columbus married daughter of a renowned navigator.

A great aid to navigators of that time was the Mariner's Compass, which had been introduced in Europe in the 12th century. The needle
Columbus sought aid:
1. From King John of Portugal.
2. From his native city of Genoa.
3. From France.
4. From Spain. Ferdinand and Isabella fitted out an expedition.

Causes leading to discovery:
1. Belief in rotundity of earth.
2. Demand for a nearer route to India.
3. Acquisition of wealth and territory.
4. Spreading of the Catholic religion.

Hindrances:
1. Insufficient knowledge of geography.
2. Ignorance and superstition of people.
3. Vessels of poor quality.
4. Moorish wars.

VOYAGES OF COLUMBUS (4 IN ALL); DISCOVERIES MADE.
1. 1492—Columbus discovered San Salvador, Cuba, Hayti.
2. 1493—Columbus discovered Jamaica, Porto Rico, Windward Islands.
3. 1498—Columbus discovered Island of Trinidad, near mouth of Orinoco River, South America.
4. 1502—Columbus discovered Central America and Isthmus of Panama.

Death and Burial.
Died at Valladolid, Spain; was buried there, remains then taken to Seville, later to Hayti; then to Cuba, and after the Spanish-American War taken back to Spain.

PERIOD OF COLONIZATION (1607-1775)

VIRGINIA (1607). OLD DOMINION.

First explored by Sir Walter Raleigh, who made two fruitless attempts to colonize it, 1585 and 1587.

Received its name from Queen Elizabeth, who styled herself the Virgin Queen.

First permanent settlement at Jamestown 1607 by the London Company.

The London Company was a company of "noblemen, gentlemen, merchants" in and about London to whom was granted all territory between 34 and 48 parallels. It was dissolved by the king in 1624.

Plymouth Company, composed of "knights, gentlemen and noblemen" residing in Plymouth, was granted the territory between 40 and 48 parallels. They surrendered their charter in 1635.

Colonists—105 in number; were idle; came in search of wealth and had no intention of working.

Government—
2. Royal Province—From 1624-1673.

Charles I. gave Virginia to two of his favorites, but it became a royal province in 1608 and remained so until 1776.

GOVERNORS.

Name.
Wingfield—Was deposed for bad conduct; succeeded by
John Smith—Starving Time; best governor; made a rule that all men
should work six hours; his life was saved by Pocahontas.
Lord Delaware—Colony prospered.
Sir Thos. Dale—Reformed the colony by abolishing public warehouse,
and gave each man a piece of land, thereby encouraging industry;
cultivation of tobacco commenced.
Argall—Oppressed the Colonists.
George Yeardly—House of Burgesses; introduction of slavery.
Religion—Church of England; no Catholic priest tolerated in the colony.

Manners—Virginians were hospitable and social, not so constrained in their manner as the New England colonists. Amusement was sought in out-door sports.

NOTED EVENTS.

1609-1610—Starving Time.
1619—First legislative body in America (House of Burgesses), consisted of two delegates from each of the 11 plantations.
1619—Slavery introduced (30 slaves).
1622—First Indian Massacre, planned by Opechancough. Jamestown was saved thru the warning of a friendly Indian.
1624—Virginia became Royal Province.
1644—Second Indian Massacre.
1660—Navigation Acts passed. By this the colonists were forced to carry on their commerce with England only, and in English vessels.

NEW NETHERLANDS—DUTCH COLONY.

Harbor of New York first visited by Verrazzani in 1524.
Champlain entered the state from the North in 1608.
Henry Hudson explored Hudson River as far as Albany in 1609.
Holland based her claim on the explorations of Hudson.
First settlement at New Amsterdam on Manhattan Is. made by
the Dutch West India Company 1613.
Second settlement of Dutch on Castle Island near Albany 1614.
First Dutch families arrived at Manhattan 1623.
Object of the Colony was wealth; of the colonists to make homes.

DUTCH GOVERNORS.

Peter Minuit—Bought Manhattan Islands, $24 of trinkets.
Wouter Van Twiller—William Kieft—Very cruel to Indians, caused much bloodshed for two years; peace made thru intercession of Iroquois; kind to F. Jogues; ransomed him.
Peter Stuyvesant—Called Hot-headed Peter on account of stubbornness. Conquered New Sweden 1655. 2. During his administration people wanted a legislature; be allowed towns to elect delegates, but gave them no power. This enraged people and they forced him to surrender to English 1664.
1. Dispute between English and Dutch about boundary line of Connecticut Colony and New Amsterdam. A treaty was made in which the Dutch gave up eastern part of Long Island, and obtained promise that Connecticut boundary should not come within ten miles of Hudson River. Treaty never ratified.

Growth of Colony rapid, because it was free for all multitudes.

Patrons—The government granted a tract of land 16 miles on one side or 8 miles on both sides of a running water, to any person who would succeed in founding settlement of 50 persons over 25 years of age. Such a person received the title of Patron or Patron. This system was beneficial in settling the colony. The Patron who began a settlement agreed to do three things:
1. To pay the expenses of the emigrants’ passage from Holland.
2. To stock a farm with all necessary animals and implements.
3. To provide a schoolmaster and minister.

In return the emigrant bound himself:
1. To cultivate the patron’s land for 10 years and not to leave without permission.

1676—Bacon’s Rebellion—caused by the refusal of Berkeley to protect the colonists from Indians. Jamestown was burned.
1692—William and Mary’s College founded.
1732—Birth of George Washington.

Occupation—Cultivation of tobacco was leading occupation. It was commenced by John Rolfe, later became legal currency. 1 lb. = $56. It increased population and commerce, for criminals from Europe and jails from all parts were brought to help cultivate. They were called “indentured servants.” In reality they were slaves, though set free after a certain time.

It prevented the growth of towns, because tobacco exhausted the soil, hence the planters required immense tracts of land and extended their plantations farther from each other. This made free schools an impossibility.
2. To give the patroon the first opportunity to buy any grain or produce that he might have to sell.
3. To bring all disputes about property, etc., to the patroon's court.

ENGLISH GOVERNORS.

Nicolls—Ruled wisely.
Lovelace—Ruled mildly.
Major Andros—Eight years, deserved name of tyrant.

Thos. Dongan—Irish Catholic.
Called together the first legislative assembly of N. Y., 1685, which was composed of 17 members from the different towns of New York. They adopted a charter for their own government, providing that supreme power shall forever be and reside in the governor. He granted the famous "Dongan Charter" (1686), which still forms basis of laws of N. Y. City.

Dongan Charter secured:
1. Right to vote.
2. Trial by jury.
3. Taxation by the Assembly.

Slaughter—

IMPORTANT EVENTS.

Leisler's Rebellion—When James II. was dethroned Leisler assumed control of the government in the colonies, pretending to hold it for the new king. He persecuted the Catholics. When the king's troops arrived he refused to give up control and was taken prisoner and executed.

Negro Plot (1747)—Catholics and negroes were accused of having plotted to burn the town. Bigotry was at its height, and four white people were hanged; 14 negroes burned and 18 hanged.

Education—For a long time backward, but King's (Columbia) College was founded 1754.

Religion—Under Dutch rule—Reformed Church; no persecution of other creeds.

Under English rule—Episcopal Church.

Indians—They were, generally speaking, justly treated and paid for the land, so were very kind to Dutch, except during Administration of Kieft, who was very cruel to them. He sent murdering expeditions among them; offered prizes for their heads and caused a party of them who sought protection of the Dutch to be cruelly massacred. The Indians retaliated and for two years there was continual bloodshed until peace was restored thru intercession of Iroquois.

NATIONS CLAIMING TERRITORY OF NEW YORK.

1. English—Claim based on explorations of Cabots, settled on Long Island and Oswego (1722).
3. French—Claim based on explorations of Champlain.

Champlain's Expeditions to New York:
1. He entered from Lake Champlain, met Iroquois, fired guns, Indians ran. Easy victory, but fatal blunder, because Champlain made last enemy of the most populous tribes (Iroquois).
3. Champlain entered state from Lake Ontario, was defeated by Indians.

Another Frenchman tried to gain foothold, failed on account of enmity of Iroquois.

French also built a fort at Crown Point (1713), Ogdensburg, N. Y.

4. Germans—Settled at German Flats in Mohawk Valley (Ilion).
5. Swedes—Had no right to territory but settled on the Delaware River in region claimed by New Netherlands, conquered by Stuyvesant, 1665.

MASSACHUSETTS.

Two distinct colonies made:
1. Plymouth by Pilgrims, 1620.
2. Massachusetts Bay by Puritans, 1628.

PLYMOUTH.

Government—Plymouth had no charter but declared loyalty to king (1620-86).
Objective—Religious Liberty.

Governors—
John Carver—Died first winter.
Wm. Bradford—Made treaty with Indians which lasted 50 years.

The growth of the colony was slow and in 1601 it was absorbed by Massachusetts Bay Colony. No religious tolerance was granted.

MASSACHUSETTS BAY COLONY.

1. Settlement at Salem by John Endicott.
Object—Religious liberty (no sect other than Puritan tolerated).

Government—In both the Massachusetts colonies public matters were settled in town meetings; when the towns became too numerous representatives were sent to the General Court. Only church members could vote.

John Endicott was the first Governor.

Governors under the charter were:

In 1684 Charles II. abolished charter and Massachusetts became a royal province.

Royal Governors:

In 1661 a new charter was granted and Maine, Plymouth and Massachusetts Bay became one; all property holders, except Catholics, could vote.

Religion—Puritan; no toleration to any other sect. Roger Williams and Anne Hutchinson were banished. Quakers persecuted.

Education—The public school system of U. S. originated in Massachusetts. The Gen. Court gave a whole year's tax toward founding a college (Harvard). Rev. Harvard left his library, 320 volumes, and
half his estate £250 (20,000) to the college. Out of gratitude it was named in his honor.

**IMPORTANT EVENTS.**

1620—Landing of Pilgrims at Plymouth.

1629—Puritans settle Salem and later Boston.

1633—Roger Williams banished.

1634—Confederacy of the four colonies for mutual protection. Plymouth, Massachusetts Bay, Connecticut, New Haven, organized a military league called “New England Confederation.” Purpose: Self-protection against Indians as well as defense against Dutch who still claimed Connecticut Valley. The Confederation lasted 40 years and is the first experiment in united-action by American colonies. Maine and Rhode Island were not invited, owing to difference of religious ideas.

1636—Quaker Persecution; reasons of persecution: 1. Independent religious views. 2. Would use no titles of honor or respect to anyone. 3. Observed no ceremonies in worship. 4. Refused to do three important things: 1. Would not give testimony under oath. 2. Would not pay taxes to support public worship. 3. Would not do military service nor bear arms even in self-defense.

1637—King Philip’s War ended in his death and overthrow of Indian power forever.

1639—Salem Witchcraft. The children of a minister claimed to be bewitched by an old colored woman. She confessed and accused many other persons. A reign of terror ensued, no one was safe. Members of families accused one another; before it lasted 20 persons had been executed.

Pilgrims or Separatists—Were members of the Puritan Church, who left England and dwelt in Holland for a time, and then came to America.

Puritans—Members of same church, but came direct from England.

**NEW HAMPSHIRE.**

Settled at Dover and Portsmouth, 1623, by persons in employ of Gorges and Mason, Englishmen.

Object—Personal gain.

Religion—Principally Church of England.

The region extended from the Kennebec to the Merrimac, which Gorges and Mason divided. Gorges took the part east of the Piscataqua River (Maine); in 1631 it was united to Massachusetts and controlled by her till its admission. Mason took the west and named it New Hampshire.

In 1719 Scotch-Irish emigrants settled Londonderry and introduced linen-weaving.

Government—In 1641 it became united to Massachusetts, until 1680, when it became a royal province; 1690 they were again united but final separation took place in 1741.

Education—Dartmouth College founded 1769.

**CONNECTICUT COLONIES.**

Windsor or Connecticut Colony was settled by emigrants from Massachusetts in 1635.

Saybrook settled by John Winthrop 1635.

Hartford settled by Thomas Hooker 1636.

Pequot War—Entire tribe literally destroyed by colonists.

Constitution—In 1639 people from these towns met at Hartford and drew up a constitution by which they were to be governed. No mention was made of English King; first document of the kind in America; model of all future constitutions.

New Haven—1638, by Puritans. Only Church members could vote.

Blue Laws enforced.

No one may run on the Sabbath, or walk any place but to and from Church.

No one shall travel, cook, or sweep on the Sabbath.

No woman shall kiss her child on the Sabbath.

Every male shall have his hair cut round like a cap.

Character of Puritans—Their religious views were stern, consequently their manners partook of the same cast. Amusements were forbidden, gayety deemed sinful. Every town had its public whipping post; many offenses were punished by the stocks; gossips and scolds were gagged. These laws, stern in themselves, produced a hardy race, capable of daring and doing much. Education was greatly encouraged, throughout New England.

**MARYLAND (1634).**

Settled at St. Mary’s by English Catholics under Lord Baltimore (Cecil Calvert).

Named in honor of Queen Henrietta Marie.

Absolute liberty granted to all, hence persecuted people of every nation and sect flocked to Maryland.

Clayborne’s Rebellion—A Virginian named Clayborne had made a settlement in Chesapeake Bay. He refused to obey the laws of Maryland, and was driven out. Later he took advantage of war in England and caused war in Maryland.

Toleration Act—In 1649 this act, which provided that all Christian denominations should be protected in Maryland, was passed.

Civil War—As a result of the Toleration Acts the Protestants became more numerous than the Catholics and obtained complete control of the legislature and the Catholic religion was proscribed. Civil War followed. Catholics were defeated and Baltimore (1655) driven out but recalled (1661).

Colonists flourished until dethronement of James, when Protestants again seized the government and oppressed Catholics and established Church of England.

Annapolis—Was made capital 1699.

Baltimore—Founded 1729.

Manners—Aside from religion the people were much like the Virginians.
RHODE ISLAND.
Settled 1636 by Roger Williams at Providence.
Entire liberty, civil and religious, granted to all, hence the colony
flourished.

DELAWARE (1638).
Settled by Swedes at Wilmington.
1645—Dutch took it from Sweden.
1666—English took it from Dutch.
1681—English sold it to Wm. Penn, who called it the Territories.
When the Revolution broke out Delaware declared herself an indepen-
dent state and was first to adopt constitution of 1787, therefore was
the First State in the Union.
New Sweden is often called the Bumble Bee.
England is often called the Snake.
New Amsterdam is often called the Toad.
The Toad swallowed the Bumble Bee and the Snake swallowed
both Toad and Bumble Bee.

CAROLINAS (1653).
First Settlement at Albemarle Sound, N. C., by immigrants from
Virginia.
1670—Two shipsloads of emigrants from England settled Charles-
town, S. C.
Religious toleration was granted; this induced many French Hug-
netots to come and settle; best kind of people for a colony, hence it
flourished.
1729—Carolina divided into two parts, each governed by Royal
Governor.
Grand Model—Constitution drawn up by Locke for the two Caro-
linas—impracticable, and was abandoned.
Rice—Captain of a vessel from Madagascar gave the governor of
South Carolina a bag of rice. It was planted and rice culture became
leading industry. The export of this and indigo made Charleston the
most thriving city of the south.

NEW JERSEY (1664).
In 1617 the Dutch built two forts, but permanent settlement made
at Elizabethtown 1664. West part sold to the Quakers 1674, remainder
was sold in 1682.
1702—Both parts united—royal province; called New Jersey.

Pennsylvania (1681).
Settled at Philadelphia 1681, by William Penn.
Object—Asylum for Friends and Quakers.
Religion—Friends.
Government—First, proprietary, then royal province under New
York, but from 1694 till Revolution it was proprietary (Penn's heirs).
Penn's "Great Laws" was basis of all laws of Pennsylvania. By
this Law it was provided:

1. All colonists should be protected in worship of God; no
one should be forced to support or attend any form of worship
against his will.
2. All resident taxpayers had right to vote, regardless of creed.
3. Every child at age of 12 should be taught trade or useful
occupation.
4. Only murder and treason punishable with death. Pennsyl-
vania was first in history of world to order that every prison
should be a work shop and place of reformation.
1682—Penn's treaty with Indians under Elm Tree (Philadelphia).
In accordance with Quaker faith, no oath was taken. Only treaty that
was not sworn to and never broken.
Tree blown down 1810. Monument marks spot.
Education—No system of schools existed until the 19th century.
Philadelphia—First National Capital (1790-1800). First Congress
met here; Constitution framed here. Declaration signed.
Mason and Dixon Line—Dispute between Maryland and Pennsyl-
vania. Two English surveyors employed to settle boundary, drew a
line west from northern boundary of Maryland; became one of the
most famous boundaries, because was separation between free and
slave states of the 13 original.

GEORGIA (1733).
Settled at Savannah by colonists under Oglesboro.
Object—Asylum for persecuted debtors from England.
Name—In honor of George III.
Occupation—Silk culture, but this was abandoned for cotton raising.
Religion—Liberty of conscience to all except Catholics.
Government—Charter until 1752, when it became a Royal Province,

GOVERNMENT OF COLONIES.
There were three forms: Charter, proprietary and royal.
Charter Colonies: Connecticut, Rhode Island, Massachusetts.
A charter was a contract between the king and the colony which
specified the rights and powers each was to enjoy. Could not be
changed without consent of both.
Proprietary Colonies: Pennsylvania, Delaware, Maryland.
Such colonies were governed by a proprietor, who had received the
land from the king; he had full right to dispose of the land and to
establish government.
Royal Colonies: New York, New Hampshire, New Jersey, Vir-

MANNERS, CUSTOMS, DWELLINGS AND OCCUPATIONS OF COLONIES.

NEW ENGLAND COLONIES.

Manners and Customs—Industrious, sober, enterprising and religious in their own way, but narrow-minded, short-sighted and cruel to Indians.

Dwellings—At first log cabins with immense chimney, later made of heavy oak timbers put together in solid manner. Large open fireplace. They had no stoves, the cooking was done on large brick ovens and over or before the huge open fireplace, with its swinging crane with pot-hooks to hold the iron pots for cooking.

The kitchen was the chief apartment. The ceiling was rarely seven feet high. From the bare joists hung bunches of herbs, seed-corn, and long strings of drying apples. The walls of the room, in the better buildings, were plastered and whitewashed. The furniture was plain; a tall wooden clock; a dresser set out with the cherished pewter dishes brought over from England; a spinning wheel; and, perhaps, a loom for weaving.

The food was simple; mush and molasses, corn-cakes, potatoes, fish, etc.

Occupations—Trade, agriculture and fishing. Manufactures in general were forbidden by England.

MIDDLE COLONIES.

Manners and Customs—The English were social, hospitable.

Occupations—Same as New England.

DUTCH IN NEW YORK.

Manners and Customs—Dutch were thrifty, honest, tidy and hospitable.

Dress, furniture, etc., very simple. Carpets were unknown until 1750, but white sandaled floors were common. The people breakfasted at dawn, dined at 11, retired at sunset.

Dwellings—Wood, gable ends built of small black and yellow bricks from Holland; had many windows and doors. Country houses were called "bowreiers." Clocks and watches were unknown; time was told by hour glasses.

Occupation—Same as English.

SOUTHERN COLONIES.

Manners and Customs—Social, hospitable, fond of amusements as horse-racing, fox hunting, and other outdoor sports.

Dwellings—Like those of northern English colonies; stately mansions with verandas, slaves’ dwellings apart, etc.

Occupation—Raising tobacco, corn, sweet potatoes, rice, cotton, fishing, especially oysters.

MONEY, COMMERCE, ETC., OF COLONIES IN GENERAL.

Money—The weights, measures and money of colonies were for a time same as England; later they coined additional money of their own, e. g., Mass.—Pine tree shilling, so called from pine on one side.

Commerce—Foreign, with England and West Indies. Domestic, among colonists.

Articles Exported:

New England Colonies—Rum, salt fish, and flour.

Middle Colonies—Furs, lumber, iron, paper.

Southern Colonies—Tobacco, rice, indigo, tar, turpentine.

Articles Imported:

Hardware, glass, crockery, clothing, furniture, household utensils from England, sugar, molasses, cotton from West Indies.

Modes of Travel:

1. On foot.
2. Horseback.
3. Stage-coach.

Broad streams were crossed by flat ferries.

Colonists had very poor means of communication; there were no trains, no steamboats or electric cars; roads were bad; stage coach clumsy; required more time to go from Boston to Virginia, than now from Boston to England.

Mail—Was carried by a post rider on horseback. Never more than three mails a week between great towns; in south scarcely once a month. Postage was generally not prepaid, 25c per letter.

NOTED TREES IN COLONIAL HISTORY.

Elm—Penn’s treaty with the Indians was never broken and was not sworn to. It was made under an Elm tree.

Oak—Connecticut Charter hidden in an Oak.

Rejected by the King, because he thought it gave the colonists too great a measure of independence.

Incidents of 1755:
1. Capture of Nova Scotia or Acadia.
2. Braddock against Fort Duquesne, defeated because he was too conceited to take advice from Franklin and Washington, who had warned him of the treachery of the Indians. The Indians never met their enemies in open battle, but fired at them from behind trees, bushes, etc., always watching to take them unguarded. Braddock’s defeat shows that the Indian method of warfare was better adapted to a wild country than the method of the British regulars, because the cannon and heavy artillery were a hindrance in the wilderness.

REVOLUTIONARY PERIOD—(1775-1783)

General Cause:
England claimed right to tax colonies without allowing them a voice in Parliament. The colonists declared that "Taxation without representation is Tyranny."

Remote Causes:
England treated the colonists as an inferior class of people and was determined to keep them dependent. All the laws favored English manufacturers and gave colonists no rights. Their commerce was ruined by the

Navigation Acts:
These Acts were continually disregarded. England tried to enforce them.

Immediate Causes:
1. Writs of Assistance—Were warrants authorizing officers to enter colonists' homes to search for smuggled goods.
2. Stamp Act—(1765, repealed 1766) which ordered British stamps to be placed on all documents, newspapers, etc. Parliament repealed Stamp Act, but passed "Declaratory Acts," i.e., the crown, with consent of parliament, had, has and of right ought to have full power and authority to make laws and statutes of sufficient force to bind the colonies and people of America, subject to crown of Great Britain in all cases whatever.
This act led to the meeting of the "Stamp Act Congress" in New York Oct. 1765. All the colonies, except New Hampshire, Virginia, North Carolina and Georgia, sent delegates. The Congress discussed condition of country, issued addresses to the king and parliament, and made a declaration of rights: Taxation without representation is Tyranny.
3. Mutiny Act—Ordered that the colonists should provide English soldiers with shelter and provisions.
4. Townshend's Acts—(Three in number)—
   1. Prohibited N. Y. legislature from making any laws until it complied with Mutiny Act.
   2. Enforced law relating to trade.
   3. Placed tax on glass, tea, paper, etc.
5. Boston Massacre—March 5, 1770.
When Parliament heard of the Boston Tea Party, it determined to punish Massachusetts by passing laws which the colonists called:
7. The Five Intolerable Acts: 
   1. Boston Port Bill (1774), which closed Boston Harbor.
   2. Transportation Bill, which provided that all officers guilty of murder must be sent to England for trial.
   3. Massachusetts Bill, changed charter of Massachusetts, ordered a military government for the colony; forbade public meetings, except for election of town officers.
   4. Quartering Act, which legalized the quartering of the troops on the people.
5. Quebec Act, enlarged province of Quebec and granted liberty of conscience to all people in Canada.
Effect of the Quebec Act:
Colonists protested and were unkind to Canadians; this embittered Canadians, and later when struggle with Great Britain came, they refused to aid the colonists.
These various Acts led to the calling of the
First Continental Congress, Sept. 5, 1774, composed of delegates from every state except Georgia. They met in Carpenter's Hall, Philadelphia.
It issued:
1. An address to the colonists.
2. An address to the Canadians.
3. An address to the people of Great Britain.
4. An address to the king.
5. A Declaration of Rights, i.e., not to import, expose or use British goods.
Committees of Correspondence (1773)—Committees appointed to state rights of colonies and of Massachusetts in particular to communicate and publish same to the several towns in this province and to the world. Benj. Franklin and Sam. Adams were members.
Preparations were now made for war. Two distinct parties had arise, one called Tories, favored the King; the other called Whigs, approved of war, did not favor the King. Companies of soldiers called Minute Men, were formed.
Events of 1775:
1. Battle of Lexington, April 19; 7 Americans, 300 red-coats killed.
2. Capture of Ticonderoga and Crown Point by Americans, May 10th.
   1. It sent petition to King; he refused it.
   2. Voted to raise 20,000 men.
   4. Voted $2,000,000 paper money to defray expenses.
Result—Although defeated, the Americans were encouraged, because they saw their farmer soldiers could cope with British regulars.
5. Attack on Quebec, failure.

1. Evacuation of Boston, March 17th. British forced to leave; they sailed for Halifax.

Washington and La Fayette with 16,000 men surrounded Cornwallis on land and Count de Grasse with the French fleet cut off his escape by sea. For three weeks the Americans poured a continual fire into Yorktown. Cornwallis, seeing the uselessness of resistance, surrendered, Oct. 19, 1781.
British did not evacuate New York until Nov. 25, 1783.

3. Great Britain ceded Florida to Spain.
4. United States granted free navigation on Mississippi and Great Lakes.

Articles of Confederation—the laws by which the colonists were governed from 1777 until adoption of present constitution.

Under Articles of Confederation, Congress had power to:
1. Declare war and make peace.
2. Appointment ambassadors, and acknowledge those from other countries.
3. Coin money.
4. Settle disputed boundaries.
5. Provide for public domain.
6. Advise states, but each state was practically independent.

But these articles gave Congress no power to:
1. Enforce laws.
2. To pass sentence on those who violated the laws.
3. To levy taxes or raise money or pay debts.
4. To regulate trade.
5. To enforce treaties.

Congress had but one house, the government consisted of the legislative department only; large and small states were represented equally.

These articles were defective because the state could not be forced to obey congress; there was no revenue, commerce was dull, interest and principals could not be collected, and before long congress fell into disrepute; hence dissatisfaction prevailed and led to the adoption of our present constitution. At the federal convention held in Philadelphia, May, 1787, the constitution was proposed for adoption, the ratification of nine colonies being necessary; New Hampshire (the ninth colony) ratified June 21, 1788, and then the constitution became the law of the land.

Terms: Spain had to give up all claims to Cuba, ceded Porto Rico, the island of Guam and the Philippines to United States. The rights to be given to the inhabitants of these new possessions should be decided by Congress, with exception that they should have religious freedom. United States had to pay $20,000,000 for Philippines. Cost of war to United States $1,500,000,000 and 430 soldiers killed—many died of disease.

Democrats opposed the taking of the Philippines without the inhabitants consent. Republicans favored proposition, declaring if we did not take possession, the inhabitants would fall into anarchy and other nations would seize various portions.

the part of canal which she constructed; $10,000,000 was paid to Repub-

ACQUISITION OF TERRITORY BY U. S.

There are four principal methods of acquiring territory.
2. By Purchase—Louisiana, Alaska, Florida; Gadsden Purchase (southern part of Arizona, and New Mexico).
3. By Conquest—California, Wyoming, Colorado, New Mexico and Arizona (close of Mexican War); Porto Rico, etc.

United States acquired the islands of Guam, Wake and Philippines by treaty at the close of Spanish War.

Cuba is under protection.

ORIGIN OF "UNCLE SAM."

During the war of 1812 Elbert Anderson purchased in Troy, N. Y., a large amount of pork for American Army. The pork was inspected by Samuel Wilson, who was popularly known as Uncle Sam. The barrels of pork were marked E. A. (Elbert Anderson), U. S. by a clerk who wished to play a joke. When asked what the letters U. S. meant (the abbreviation had never been used for United States), he said he did not know unless it meant Uncle Sam, meaning Uncle Sam Wilson, the inspector. Since, then, the whole pork was for the army, the workmen considered it quite a joke on Mr. Wilson, and then gave his nickname to the Union. The incident was recorded in all the papers and from that time our country has been known at home and abroad as "Uncle Sam."
